0.0
pattern correlation (schematic)
b
Neural resumption (DMN realignment)
Story recall (memory)
PMC persistence coefficient b (per SD of persistence; ± SE)
n=90 n=72 n=56 n=42 n=30 n=20 n=12 n=6 n=2
p = .056
off-diagonal, p < .05
off-diagonal, n.s.
minimum retained lag |i − j| (TRs)
c
Neural resumption vs PMC persistence
Story recall vs PMC persistence
b = +0.013, p = .006
b = +0.035, p = .013
DMN realignment (within-condition residuals)
Story recall (within-condition residuals)
PMC persistence (|i − j| ≥ 6) (within-condition residuals)
